ISOLATOREN FÜR DIE ELEKTROTECHNIK

## Declaration of Conformity to RoHS

The EU directive 2011/65/EU restricts the use of certain hazardous substances in electronic and electric equipment.

RoHS directive including its amendment directive EU 2015/863 specifies maximum levels for the following restricted materials:

Lead (0,1 %)  
Mercury (0,1 %)  
Cadmium (0,01 %)  
Hexavalent chromium (0,1 %)  
Polybrominated Biphenyls (PBB) (0,1 %)  
Polybrominated Diphenyl Ethers (PBDE) (0,1 %)  
Bis(2-ethylhexyl)phthalat (DEHP) (0,1 % )  
Benzylbutylphthalat (BBP) (0,1 %)  
Dibutylphthalat (DBP) (0,1 %)  
Diisobutylphthalat (DIBP) (0,1 %)

Given threshold limits refer to the level of homogeneous material.

For the purpose of this directive ,homogeneous material' means one material of uniform composition throughout or a material, consisting of a combination of materials, that cannot be disjointed or separated into different materials by mechanical actions such as unscrewing, cutting, crushing, grinding and abrasive processes.

The directive EU 2011/65/EU allows copper alloys such as brass to contain up to 4% lead. Some of our products contain brass inserts, which are manufactured containing less than 4% lead and therefore meet the requirements of the EU directive.

We herewith confirm and assure that to our best knowledge our products fulfill the requirements of RoHS 2011/65/EU and its amendments directive EU 2015/863 and EU 2017/2102. Besides the described exception, which is covered by the directive, the above mentioned substances cannot reasonably be expected within our products, we do not check their absence by any testing.
